# Medicare Enrollment at 65

**Aging into Medicare requires either automatic or active enrollment.**

## Automatic

You are automatically enrolled into Original Medicare (Part A + Part B) if you're already receiving retirement benefits from Social Security or the Railroad Retirement Board when you become eligible at age 65.

## Active

If you're not receiving retirement benefits when you become eligible for Medicare at age 65, you must actively enroll in Part A and/or Part B during your Initial Enrollment Period, which runs for 7 months.

## Your coverage options at age 65:

### Original Medicare

Part A (hospital coverage) + Part B (medical coverage).

### Medicare Advantage (Part C)

Private alternative to Original Medicare. It covers what Original covers, plus added benefits that vary by plan.

### Medicare Part D

Private coverage for prescription drugs.

### Medicare Supplement (Medigap)

Covers some of the out-of-pocket costs under Original Medicare.
